Aspiratori assiali intubati Duct axial fan

ErP 2009/125/CE

UE 327/2011

Conformi alla Direttiva ErP e al Regolamento UE 327/2011 (FAN)

Comply with ErP Directive and EU Regulation 327/2011 (FAN)

VERSIONI | VERSIONS

CC ATEX

Versione antideflagrante secondo la Direttiva 2014/34/UE
Explosion-proof version according to Directive 2014/34/UE

DESCRIZIONE

Gli aspiratori assiali intubati della serie CC sono utilizzati in applicazioni canalizzate che necessitano di grandi portate d'aria con cadute di pressione non elevate, come ad esempio impianti di ventilazione e raffreddamento in ambito industriale, navale, commerciale, civile, energetico... Questa serie presenta, rispetto ai ventilatori centrifughi, il vantaggio di un minor ingombro e una maggiore facilità d'installazione. La serie standard è costituita da modelli con diametro della ventola da 310 a 1600 mm. Possono essere realizzati con motori di diversa polarità a seconda della taglia e delle prestazioni richieste. Sono idonei a convogliare aria pulita con temperatura da -15°C a +50°C in servizio continuo.

COSTRUZIONE

- Cassa in lamiera d'acciaio, con flange di fissaggio, realizzate a norma ISO 13351. Verniciata a polveri epossipoliestiriche.
- Girante con pale a profilo alare in tecnopolimero e mozzo in fusione di lega d'alluminio. Bilanciata secondo ISO 1940. Angolo di calettamento variabile da fermo tramite tasselli di regolazione
- Esecuzione 5 (accoppiamento diretto con girante a sbalzo) e flusso aria da motore a girante.
- Motore asincrono trifase o monofase a norme internazionali IEC 60034, IEC 60072, EMC 2004/108/CE, LVD 2006/95/CE e marcato CE IP55, classe F.
- Idoneo ad un servizio S1.

MOTORE

Motore asincrono trifase IE3 a norme internazionali IEC 60034, IEC 60072, EMC 2014/30/UE, LVD 2014/35/UE e marcato CE, IP55, classe F. Idonei a servizio S1 a carico costante. Esecuzione 4 (accoppiamento diretto con girante a sbalzo) e flusso d'aria da girante a motore.

ACCESSORI

CCpro - Prolunga con portellina d'ispezione
CCr - Rete di protezione piana
CCrc - Rete di protezione conica
CCst - Staffe di fissaggio
CCbo - Boccaglio in aspirazione/mandata
CCsa e CCsb - Silenziatori con e senza ogiva con tre diverse lunghezze
CCf - Controflange piane
CCfc - Controflange con collare
Supporti antivibranti.

DESCRIPTION

The tube axial fans of CC series are used for ducted installations requiring large airflow with relatively low pressure drop, like ventilation and cooling systems in industrial, naval, commercial, civil, energetic fields. This series has, compared to centrifugal fans, the advantage of being smaller in dimensions and easier to be installed. The series consists of different sizes with impeller diameter from 310 to 1600 mm. CC fans can be fitted with motors of different polarity, depending on size and required performance. Suitable for conveying clean air with temperature from -15°C to +50°C in continuous service.

CONSTRUCTION

- Short casing in steel sheet, with fixing flanges manufactured according to ISO 13351 standard. Protected against atmospheric agents by epoxy paint.
- Axial impeller with aerofoil profile blades in technopolymer and die-cast aluminium hub, balanced according ISO 1940. Variable pitch angle in still position with setting means.
- Execution 5 (with impeller directly coupled to motor with feet) and airflow from motor to impeller.
- Asynchronous three-phase or single-phase motors according to international standards IEC 60034, IEC 60072, EMC 2004/108/CE, LVD 2006/95/CE, CE marked, IP 55, class F.
- Service S1.

MOTOR

Asynchronous three-phase IE3 motors according to international standards IEC 60034, IEC 60072, EMC 2014/30/UE, LVD 2014/35/UE, CE marked, IP55, class F. Suitable for S1 service at constant load. Execution 4 (with impeller directly coupled to motor with feet) and airflow from impeller to motor.

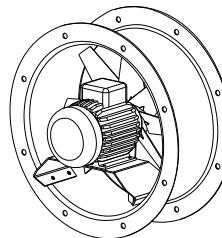

ACCESSORIES

CCpro - Extension (for long casing version) with inspection porthole
CCr - Flat protection guard
CCrc - Conic protection guard
CCga - Flexible connectors
CCst - Support feet
CCbo - Inlet/outlet bell mouth
CCsa and CCsb - Silencers, with and without pod, in three lengths
CCf - Counter flange flat
CCfc - Counter flange with collar
Anti-vibration mounts.

CASSA CORTA | SHORT CASING

I ventilatori della serie CC sono in esecuzione a cassa corta di standard, per semplicità d'installazione, movimentazione e contenimento dei costi. Quest'esecuzione è anche concepita per il montaggio nella parte iniziale o finale di una canalizzazione. In questo caso, una corretta installazione prevede l'utilizzo del boccaglio "CCbo" (vedere accessori).

The fans of CC series are in short casing execution as standard, for ease of transport and installation and for cost saving. This execution is also suitable for assembling in the initial or final part of a ducted system. In this case a correct installation foresees the use of the inlet/outlet bell mouth "CCbo" (see accessories).

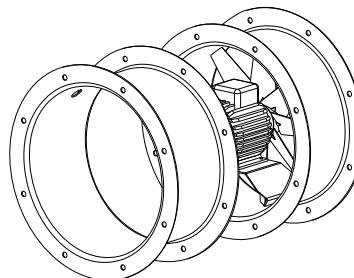

CASSA LUNGA | LONG CASING

I ventilatori della serie CC possono essere forniti in esecuzione a cassa lunga, con girante e motore completamente protetti dalla cassa, utilizzando la prolunga "CCpro" (vedere accessori). La prolunga "CCpro" è completa di portellina d'ispezione e fori per passaggio cavi.

The CC series fans can be provided in long casing execution, with impeller and motor completely protected inside the casing, by using the extension "CCpro" (see accessories).

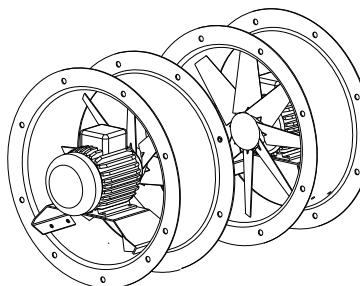

The extension "CCpro" is complete of inspection porthole and holes for cable entry.

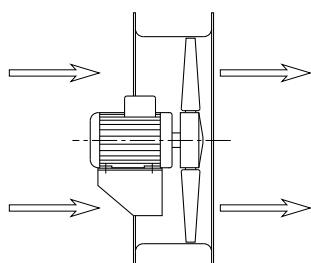

MULTISTADIO | MULTISTAGE

I ventilatori della serie CC, prevedono la possibilità d'esecuzioni multistadio, isorotanti o controrotanti (assemblaggio di due o più ventilatori monostadio con giranti rotanti nello stesso senso o in senso contrario). Queste configurazioni permettono di aumentare notevolmente la pressione sviluppata. In particolare la serie CC a due stadi controrotanti, sviluppa 2.5 volte la pressione sviluppata da un ventilatore monostadio, di pari diametro e velocità con un assorbimento di potenza non superiore alle 2 volte. Inoltre il ventilatore multistadio ha un rapporto prestazioni/livello sonoro vantaggioso, rispetto ad un ventilatore monostadio, potendo raggiungere le prestazioni richieste ad una minore velocità di rotazione.

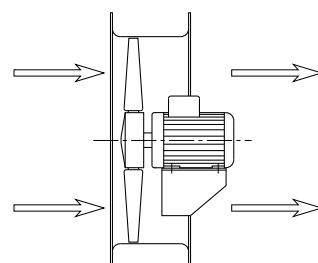

The fans of the CC series foresee the possibility of multistage execution, iso-rotating or contra-rotating (assembly of two or more single-stage fans, with impellers rotating in the same or in the opposite direction). This configuration allows to considerably increase the pressure developed. Specifically, the CC series with two contra-rotating stages develops 2.5 times the pressure of a single-stage fan of equal diameter and speed, with a power absorption not bigger than 2 times. In addition, the multi-stage option, compared to the single-stage one, has a favourable relation performances/noise, as the required performance can be achieved with a lower rotational speed.

Flusso da GIRANTE a MOTORE | Airflow from IMPELLER to MOTOR

Orientamento standard
Standard orientation

Orientamento a richiesta
Upon request orientation

A RICHIESTA | UPON REQUEST

- Girante a profilo alare, completamente in fusione di lega d'alluminio (CCZ).
- Cassa zincata a caldo.
- Flusso aria da girante a motore.
- Morsettiera esterna.
- Versioni "multistadio" isorotanti o controrotanti.
- Impeller with airfoil blades in die-cast aluminium alloy (CCZ)
- Casing protected against atmospheric agents by hot-dip galvanizing
- Air flow from impeller to motor
- Outer terminal box
- Iso-rotating or controrotating

PRESTAZIONI | PERFORMANCE

CC

Le prestazioni aerauliche sono rilevate in conformità alla norma EN ISO 5801/AMCA 210 con densità dell'aria standard avente peso specifico 1,2 Kg/m³. Alimentazione 230V/1Ph/50Hz o 400V/3Ph/50Hz. Air performances measured according to EN ISO 5801 / AMCA 210 standard with air density with 1.2 kg/m³ specific weight. Power supply 230V/1Ph/50Hz or 400V/3Ph/50Hz.

Lp Livello di pressione sonora rilevato in condizioni di campo libero, propagazione sferica, categoria di misura D a norma EN ISO 13349, nel punto di massimo rendimento, alla distanza di 3 metri dalla cassa e si presenta solo per fini comparativi.
Sound pressure level measured in free field conditions, propagation spherical, measurement category D in accordance with EN ISO 13349, at the point of maximum efficiency, at a distance of 3 meters (for comparative purposes only).

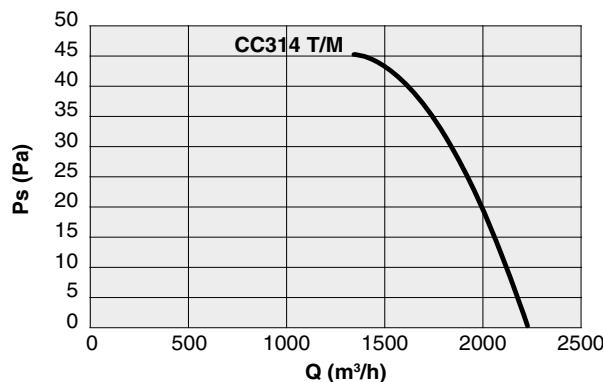

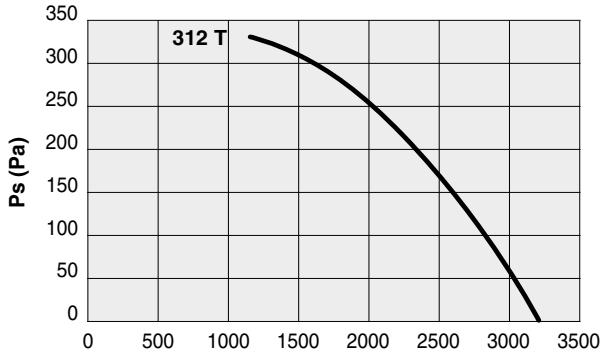

Lw Livello di potenza sonora ottenuto secondo norma ISO 3746. Tolleranza +/- 3 dB(A). Sound power level obtained in accordance with EN ISO 3746. Tolerance +/- 3 dB(A).
